(a) independent pair, $\rho = 0$
moving mean
$\lambda = 0.1$, raw
$\lambda = 0.1$, centred
$\lambda = 0.25$, raw
$(0.1, 0.9)$, raw
$(0.1, 0.9)$, centred
$\hat{\rho}(n)$
n
(b) $H = 0.7$
moving mean
$\lambda = 1/2$
$\lambda = 0.25$ c.
$\lambda = 0.25$ raw
$\lambda = 0.1$ raw
bias $\langle\hat{\rho}\rangle - \rho$
true ρ
(c) attenuation
$H = 0.4$
$H = 0.7$
$\langle\hat{\rho}\rangle / \rho$
true ρ
